## **MEDICAL SCREENING REPORT**

**DATE: 20<sup>TH</sup> JULY 2022**

Food vendor's medical screening exercise was done in 6<sup>th</sup> to 17<sup>th</sup> June 2022. This is an exercise done on the food and drink vendors to determine their fitness before they are allowed to sell to the general public. Through this exercise, food borne infections such as Typhoid fever, Hepatitis, Tuberculosis, Diarrhea diseases, urine infections could be prevented from spreading. In fact, that of 2022 was very successful because the turn-out was great and this could be felt during the outbreak of cholera in some parts of the country, the District was not hit, or was spared.

During the medical screening, it was observed that most of the people who are into food vending came to be examined medically and out of these numbers only 1.58% percent of those examined were not medically fit to sell food on the streets. Upon this revelation they were advised to visit the hospital for medication.

## MEDICAL SCREENING REPORT

Food vendor's medical screening exercise was done in **6<sup>th</sup> -17<sup>th</sup> June 2022**. This is an exercise done on the food and drink vendors to determine their fitness before they are allowed to sell to the general public. Through this exercise, food borne infections such as Typhoid fever, Hepatitis, Tuberculosis, Diarrhoea diseases, urine infections could be prevented from spreading.

During this year exercise **One Thousand Three Hundred and Twenty Six vendors (1326)** were screened. Out of that, **One Thousand Three Hundred and Five vendors (1305)** were passed fit to sell to the general public while the remaining **Twenty One vendors (21)** were found not fit. In fact, that of 2023 was very successful because the turnout was great and this could be felt during the outbreak of cholera in some parts of the country, the District was not hit

During the medical screening, it was observed that most of the people who are into food vending came to be examined medically and out of these numbers only **1.58%** percent of those examined were not medically fit to sell food to the public. Upon this revelation they were advised to visit the hospital for medication.
